WONDER  
GLOW

Wonder Pigeon is a dietary supplement especially produced for racing pigeons. It has been developed as a patented mixture of 5 monoglycerides and diglycerides of butyric acid, caprylic acid, capric acid, propionic acid and lauric acid.

In the last 3 years we achieved so many data and enthusiastic feedbacks from all kind of fanciers that we can finally promote it for what it really is: a unique product.

Wonder Pigeon is a complementary feed unique in pigeon world with 2 main properties scientifically demonstrated: a natural antibacterial activity and an incredible effect on the intestine of the birds, responsible to increase the absorption of mineral, elements, proteins, nutrients of no less than 20%. A complementary feed with astonishing results in coupling, laying, hatching, breeding, and racing performances and this without any contra-indications. A combination of fatty acids with a natural antibacterial activity and super recovery properties.

## WONDER PIGEON: THE NEW APPROACH TO PIGEON HEALTH

### REDUCED ADMINISTRATION OR ALTERNATE FOR:

- Medication to treat intestinal infections like "young bird disease" (adeno-coli, paratyphoid, colibacillosis...)
- Non protected organic acids
- Encapsulated acids
- Zinc oxide
- Oils, fats
- Beer yeast
- Pre-and probiotics

### EFFECTS OF MONOGLYCERIDES ON THE INTESTINAL FLORA:

- Correction of digestion
- Increasing the appetite
- Recovery of the intestinal flora
- Strengthening of the natural resistance
- Supporting the metabolism
- Increasing nutrients absorption

Wonder Pigeon is made of monoglycerides, links between 2 molecules: an acid, with natural antibacterial activity (but only in acid environment), linked with a molecule of fat, with extra feeding power. This link allow the acids to be effective vs some bacteria's in whatever environment while the fat-glycerol is easily absorbed by the intestine, giving both extra energy and a great recovery power to the pigeon. This is how it works, no secrets but science. Only a small amount of product on the food or in the water is needed, in other words the less expensive product on the market.

Wonder Pigeon improves: the digestion, the appetite of the pigeons, both in moulting, breeding and competitions season; the improvements are shown from the first day. It can be applied continuously from the first day after weaning, pausing it only if they are receiving medication.

The application of Wonder Pigeon is immediately noticeable in the appetite, in the feather's quality and in droppings that reflects health, both in adults and in youngsters. Decisive in the breeders for the strength of the young birds and crucial in the recovery of the pigeons after illness or treating periods, Wonder Pigeon is a product like no one to give extra energy for big efforts and related faster recovery. Wonder Pigeon is a must in many lofts.

Compared to the basic formula, Wonder Pigeon GP has not only an increased and wider range of antibacterial effects, but it helps pigeons to assimilate the proper level of nutrition facts in order to build super muscles for the racing period. For this specific reason we recommend using it at 1,5ml/ liter or 2,5ml/kg food MAXIMUM to have a perfect antibacterial effect. If you use it from 2ml to 4 ml/ litre or 3ml to 5ml/kg food, you will see your pigeon easily increase their muscle masses. No side effect, no contraindications at all.

Given the high concentration of monoglycerides, such product is recommended for sophisticated fanciers devoted to the performances and conditions of their pigeons.

## HOW TO USE

### BREEDING SEASON

#### Before Pairing

10 days WONDER PIGEON 2ml/litre or 4 ml/kg food

#### After Pairing till laying

1.5 ml/litre WONDER PIGEON + 1.5 ml/litre Wonder Pigeon G.P.

#### From hatching till babies are 14 days old

2 ml/litre WONDER PIGEON

#### From 15 days age till weaning

1.5 ml/litre Wonder Pigeon G.P.

### YOUNGSTERS

#### Every day 5 days a week

1.5 ml/litre WONDER PIGEON

#### Twice a Week

1.5ml/litre Wonder Pigeon G.P.

#### In case of illness or YOUNG BIRD DISEASE

2 ml/litre WONDER PIGEON + 2,5 ml Wonder Pigeon G.P.

### MOULTING PERIOD

#### Every day 5 days a week

2 ml/litre WONDER PIGEON

#### Twice a Week

1.5ml/litre Wonder Pigeon G.P.

### SHORT DISTANCE (1 Night Basket)

	SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY- BASKETING	SATURDAY - RACE
MORNING	Wonder Pigeon GP 2 ml/lit					Wonder Pigeon 3 ml/lit	Wonder Pigeon GP 3 ml/lit
EVENING	Wonder Pigeon GP 2 ml/lit						Wonder Pigeon GP 3 ml/lit

### MIDDLE DISTANCE (2 Nights Basket)

	SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY - BASKETING	FRIDAY	SATURDAY - RACE
MORNING	Wonder Pigeon GP 2 ml/t				Wonder Pigeon 4 ml/t		Wonder Pigeon GP 2 ml/t
EVENING	Wonder Pigeon GP 2 ml/t			Wonder Pigeon 3 ml/t	Wonder Pigeon 4 ml/t		Wonder Pigeon GP 2 ml/t

### LONG DISTANCE (3 Nights Basket)

	SUNDAY	MONDAY	TUESDAY	WEDNESDAY- BASKETING	THURSDAY	FRIDAY	SATURDAY - RACE
MORNING		Wonder Pigeon GP 3 ml/t	Wonder Pigeon GP 3 ml/t	Wonder Pigeon 5 ml/t			Wonder Pigeon GP 2 ml/t
EVENING		Wonder Pigeon GP 3 ml/t	Wonder Pigeon GP 3 ml/t	Wonder Pigeon 5 ml/t			Wonder Pigeon GP 2 ml/t

# TESTIMONIALS

## **PASCAL ARIEN - BELGIUM**

'WP gave me my first year ever without young birds disease (and I had 300 youngsters), in the past I checked my pigeons every evening in the dark to see if they didn't throw up, these days are gone...

WP simplified my life as a pigeon coach dramatically, I can focus on top condition and no worries about "Health". I give WP daily, 2-3 ml, if needed up to 5, I still believe it is the best product ever made!"

## **HUGO BATENBURG - NETHERLANDS**

I use WP the whole year, 4 days a week. 2 ml/litre Youngsters, breeders, racers, stock birds (all the pigeons that I have). In the race season the last 2 days before basketing 5 ml/litre. When I see Adeno/colie by the youngsters I give 5 ml/litre. I am 100% sure that WP is very good for general health and condition of the pigeons. It also gives more energy during the race. The feathers are very soft. I can breed 6 rounds of youngsters from my breeders every year without no problems.

## **RUDY DE SAER - BELGIUM**

Last week I visited Piet in his pigeon practice.

We talked about Wonder pigeon and I told him that I am still very satisfied and will continue the use and the support of the product. In the future.

For the first time I am using it in breeding now. The droppings around the nests are perfect and the youngsters are growing very well.

## **JOOST DE SMEYTER - BELGIUM**

The start of the season was good up till now. My breeders are getting WP nearly every day.

The racers are getting in the beginning of the racing season at least 3 times a week. As you know I am not a youngster player, but WP is doing very well for them, the get it every two days.

Up till now, we hadn't the young bird's disease. I will recommend WP to all fanciers because it's doing very well for the birds.

# TESTIMONIALS

## **BENNY STEVENINCK – BELGIUM**

I use Wonder Pigeon like this.

Breeding: every day 2 ml/litre.

This gives.

- No nest with bad/wet droppings
- Smooth 2de leg. (after the boy 10 days old)
- Equal emerging boy

Moulting period: every two days 2 ml/l

This gives-periodic maintenance healthy during this difficult period.

Racing team: when coming home 4 ml/l per litre for 2 days. The last two days before basketing 4 ml/l

This gives.

- Fast recovery after the flight
- No green droppings
- Optimal intestinal function in basketing
- Additional energy for the flight

Young pigeons: normal every two days 2 ml/l. At the young bird sickness 4 ml/l

General: 4 ml/l after using medication for 3 days.

## **ARK GILBERT - UK**

The birds are coming well and the condition of them is excellent, I am so impressed with W/P! Because of the number of birds I have, I find it much easier to feed WP on the corn. The amount I give is 150g/150ml on 20 kilos of corn. I do not give any other oils now, the only other things I add is Brockamp enery powder the last 5 feeds before the race and on their return Brockamps probac 000 and protein powder.

Still not seen young bird sickness and the feather quality and droppings have been prefect ever since I have been giving Wonder Pigeon to my birds. I have convinced people in my club to use and they feel the same about Wonder Pigeon

# TESTIMONIALS

## **Darren McFadden of D. & D. McFadden – UK - 1st open TNFC Tarbes**

“Wonder pigeon in my view is one of the best products to come out for pigeons in years and I use it every day of the year. It helps keep the pigeons in super condition, with silky feathers and nice tight droppings and the general health is 110%.

Since using wonder pigeon I have noticed it not only helps to rear lovely healthy chicks but also seems to aid in keeping young bird sickness away.

You can use wonder pigeon in conjunction with cider vinegar, probiotics, electrolytes and pretty much any product you wish to use. If I were only allowed to use one product and nothing else this would be it.”

## **EYLETTEN M&G - Belgium**

“Best thanks to the almost daily use of your product him I can realize a dream by winning 1st national Bourges with the youngsters 28569 pigeons!”

## **Team BDS - Belgie - Gebruik WP 2014 t.e.m 2017**

From the very beginning, during several breeding seasons, we administered WP continuously every day 1,5-2 ml/litre and are still very satisfied: the direct visible effects are amazing: optimal growth in the nest and perfect solid droppings around!

Once the youngsters weaned, we continue WP daily on the food at 3 ml/kg and use it instead of an oil-mixture. So, we combine WP with other food supplements as vitamins, electrolytes, normal gut microflora, ...

This results in a mutual benefit: a better intestinal absorption of all complementary feed!

Since we introduced WP the outbreaks of ‘young bird sickness became rare and they recovered naturally.

For our racing teams we use WP in a different way: it becomes a more periodical use: always at every arrival + electrolytes and the 2-3 last days before basketing.

we triple the dosage or give WP individually.

It results in a better appetite, better droppings, better trainings activity, better recovery, and a softer plumage!

## RESEARCH AND DEVELOPMENT

Wonder Pigeon is the only product that can state and document the effectiveness of the approach through studies and research made by independent and renown partner.

The formula at the base of Wonder Pigeon together with other solutions are developed in scientific collaboration with:

Guelph University: **Prof. Steve Leeson** University of Parma: Prof. Afro Quarantelli University of Piacenza: **Prof. Francesco Masoero**  
Public Animal Health Institute "Bruno Ubertini": **Dr. Loris Alborali, Dr. Giovanni Tosi** IRTA: Dr. Enric Esteve

Applications are followed in field by a specialized technical team. Customer service and fancier satisfaction are fundamental traits of our approach.

## PATENT

- EU: Patent EP 2 410 871 B1
- CHINA: Patent ZLZ01080009708.03
- UKRAINE: Patent a 201111423
- BRAZIL: Patent P11006358-7
- THAILAND: Patent 1101002024
- PHILIPPINES: Patent 1-2011- 501846
- CHILE: Patent 002276
- INDONESIA: Patent W00201103665
- RUSSIA: Patent 2541400
- MEXICO: Patent 335279
- INDIA: Patent 7287/CHENP/2011
- VIETNAM: 1-2011- 02761
- MALAYSIA: Patent PI2011004339
- EGYPT: Patent 1538/2011

The evidence of our approach is that no-one could develop a similar product, being the basic formula protected by law and patented worldwide by the manufacturer.
